DIAMOND PRO

Sandpaper disks for finishing and polishing

CE 0499

Instructions Manual
English

Professional Use Only

Read all the information of these directions carefully before using the product. Keep them for consultation, at least until the product has been totally used or there is no more interaction of the product with your last patient.

Description

The Diamond Pro Sandpaper disks are flexible, available in 4 grits (Coarse, Medium, Fine and Super Fine) and two diameters (8 and 12 mm).). It is easy placing the disk onto the mandrel; they are manufactured without a metal center, gouging and discoloration of the composite is avoided.

Forms of Presentation

Kit: Package containing 56 sandpaper disks divided into four grits: (Coarse (G), medium (M), fine (F) and Super fine (XF) with diameters of 8 and/or 12mm, 01 mandrel and instructions for the professional.
Refill: Package containing 24 sandpaper disks in the grit desired and two diameters (8 and 12mm).

Basic Composition

Disks: Polyester (PET), adhesive, abrasive and silicone rubber.
Mandrel: Nickel-plated brass (dimensions as per ISO 6360/2 and ISO 1797/2).

Indication

Diamond Pro is indicated to give shape, finishing and polishing to dental restorations used in office and in the laboratory, in order to make these materials smooth and shining.

Precautions and Contra - indications

- Single-use product (disks). Discard after use.
- Use at a low rotation and without exerting pressure on the disk during the polishing.
- Check that the disk is well fitted in the chuck before activating the rotation. Rotations which are too high can cause the disk to be expelled from the mandrel and excessive heating in the polishing area.

Instructions for Use

1. Select the disk according to the procedure to be executed.
2. Fix the disk on the mandrel fitting it in by means of the cavity in the silicone support.
3. Fit the unit (mandrel and felt disk) in the counter angle and execute the procedure using low rotation, low pressure and short, intermittent movements of the sandpaper on the surface to be treated.

Preservation and Storage

Keep the product in its original package always well sealed.

Warning:

Do not use the product after expiry date. In order to discard the product, follow the legislation of your country. Keep out of reach of Children.
